

# C9115AXE-EWC-F - Cisco Catalyst 9115 WiFi 6 Access Point

Model: C9115AXE-EWC-F | Brand: CISCO

## Product Overview

Cisco Embedded Wireless Controller on C9115AX Access Point

Product page: <https://www.linknewnet.com/products/c9115axe-ewc-f>

## Quick Specifications

| Attribute                        | Value                                                                                                                                        |
|----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| Description                      | Cisco Embedded Wireless Controller on Catalyst Access Points: Indoor, challenging environments, with external antennas, F regulatory domain. |
| Minimum software requirement     | Cisco IOS XE Software Release 16.12.2 or later                                                                                               |
| Maximum number of access points  | Up to 100                                                                                                                                    |
| Maximum number of clients        | Up to 2000                                                                                                                                   |
| Maximum number of WLANs          | 16                                                                                                                                           |
| Deployment modes                 | Cisco FlexConnect ®                                                                                                                          |
| Maximum FlexConnect APs per site | 100                                                                                                                                          |
| License                          | Smart License enabled                                                                                                                        |
| Operating system                 | Cisco IOS ® XE Software                                                                                                                      |
| Management                       | Cisco DNA Center 1.3.2, integrated WebUI, mobile app, and third party (open standards APIs)                                                  |
| Policy engine                    | Cisco Identity Services Engine (ISE) 2.2, 2.3, and 2.4                                                                                       |
| Access points                    | Cisco Catalyst 9100 Access Points and Aironet ® 802.11ac Wave 2 access points (operating in client serving mode only)                        |
| R egulatory D omain              | F regulatory domain: • 2.412 to 2.472 GHz; 13 channels • 5.250 to 5.350 GHz; 4 channels • 5.725 to 5.825 GHz; 4 channels                     |
