

# SM-48 - Cisco Firepower 9000 Series Appliances

Model: SM-48 | Brand: CISCO

## Product Overview

Cisco Firepower 9300 Series

Product page: <https://www.linknewnet.com/products/sm-48>

## Quick Specifications

| Attribute                 | Value                                                                                                           |
|---------------------------|-----------------------------------------------------------------------------------------------------------------|
| Dimensions (H x W x D)    | 5.25 x 17.5 x 32 in. (13.3 x 44.5 x 81.3 cm)                                                                    |
| Form factor               | 3 Rack Units (3RU), fits standard 19-in. (48.3-cm) square-hole rack                                             |
| Security module slots     | 3                                                                                                               |
| Network module slots      | 2 (within supervisor)                                                                                           |
| Supervisor                | Cisco Firepower 9000 Supervisor with 8 x 10 Gigabit Ethernet ports and 2 network module slots for I/O expansion |
| Serial port               | 1 x Gigabit Ethernet copper port (on supervisor)                                                                |
| USB                       | 1 x RJ-45 console                                                                                               |
| Storage                   | 1 x USB 2.0                                                                                                     |
| Power supplies            | AC power supply -48V DC power supply HVDC power supply                                                          |
| Input voltage             | 200 to 240V AC -40V to -60V DC* 240 to 380V DC                                                                  |
| Maximum input current     | 15.5A to 12.9A 69A to 42A &lt;14A at 200V                                                                       |
| Maximum output power      | 2,500W 2,500W 2,500W                                                                                            |
| Frequency                 | 50 to 60 Hz - -                                                                                                 |
| Efficiency (at 50% load)  | 92% 92% 92% (at 50% load)                                                                                       |
| Redundancy                | 1+1                                                                                                             |
| Fans                      | 4 hot-swappable fans                                                                                            |
| Noise                     | 75.5 dBA at maximum fan speed                                                                                   |
| Rack mountable            | Yes, mount rails included (4-post EIA-310-D rack)                                                               |
| Weight                    | 105 lb (47.7 kg) with one security module; 135 lb (61.2 kg) fully configured                                    |
| Temperature: nonoperating | -40 to 149°F (-40 to 65°C); maximum altitude is 40,000 ft                                                       |
| Product Code              | SM-48                                                                                                           |
| Brand                     | CISCO                                                                                                           |

## Replacement / Alternative Options

If the SM-48 is out of stock or end-of-life, these same-brand alternatives deliver comparable capability. Contact our sales team to confirm availability.
